

## INVESTMENT

*I like to think of pictures as investing in your memories. Pictures tell a story - they invoke feelings, remind you of good times, maybe even sad times. Think back to when you were a child at your grandparents house, looking through old photo. The grandparents were taken back to a time in their life, almost like a time machine and as a child you're trying to picture what the "good old days" were like. It's sad to think in this digital world your grandkids may never get to experience holding a picture in their hand..*
